PCB-Mitigation QAPP ver 2e.doc;

Ken:

Let's meet Thursday afternoon then. The attachment is the revised QAPP (unfinished) for mitigation. It contains some idea about the NASA method. I intended to finish the revision in the last weekend but wasn't able to get it done. I will certainly finish it next week.

Subject: Re: Meeting late this week

Thursday at 2:00 is best for me. Friday is my compressed day off. I will review the QAPP and other documents I can find on the network drives for ideas. Any suggestions on other documents.

Ken

Subject: Meeting late this week

Xiaoyu and Ken:

I would like to sit down with you late this week to discuss Task 1.2 NASA method and Task 2.2 Sink. These are the two areas that are still blank -- no data whatsoever. We need a plan for quick actions.

I will present some ideas about the sink test. Xiaoyu, please bring to the meeting an action plan for the NASA method.

Let's temporarily set the meeting time at 2:00 pm on Thursday. If Ken is here on Friday, we can do it in the morning.

Please give some thoughts to these topics before the meeting. Do not assume I have the answers.

Zhishi

P.S. I had an implant surgery this morning. It went well.
